

BRYAN HERNÁNDEZ LÓPEZ

Computer Systems Engineer | Frontend Developer

CDMX, Mexico | +52 55 3883 5169 | bryan.hdezl@gmail.com | linkedin.com/in/bryanhdezl | github.com/BryanHdezL

PROFESSIONAL PROFILE

Computer Systems Engineer with 1 year of experience in FrontEnd development, specialized in creating dynamic, responsive, and user-optimized web interfaces. Experience using HTML, CSS, JavaScript, TypeScript, React, and Astro, as well as styling frameworks such as Bootstrap and Tailwind CSS, applying best practices in design and performance.

PROFESSIONAL EXPERIENCE

Nueve09 – CDMX, Mexico

FrontEnd Developer

November, 2024 – Present

- Developed dynamic and responsive web interfaces with React, Astro, Bootstrap, and Tailwind, ensuring a consistent and attractive experience across all devices.
- Implemented scalable and optimized solutions, improving performance and reducing platform load times.
- Collaborated with the UX/UI team to create reusable components, increasing development efficiency and code maintainability.
- Integrated APIs and services with the BackEnd team, ensuring efficient and reliable communication between FrontEnd and BackEnd.

Sophia Learn & Health - CDMX, Mexico

Developer (Professional Internship)

September 2024 – November 2024

- Collaborated in the design and implementation of technological solutions to optimize healthcare services, applying agile methodologies.
- Developed a chatbot for promoting health courses, integrating artificial intelligence and natural language processing.
- Implemented the chatbot using Python and Node.js, connecting it to databases to generate dynamic and accurate responses.

EDUCACIÓN

Escuela Superior de Cómputo - IPN – CDMX, Mexico

Computer Systems Engineering

August 2020 – January 2025

- **Highlighted courses:** Web Development, Object-Oriented Programming, Databases, Artificial Intelligence.
- **Proyectos relevantes:**
 - **AVI-3D:** Development of an interactive 3D model of ESCOM facilities to support first-semester or exchange students, including a chatbot with text and voice queries. I developed and implemented a web application applying institutional colors and usability principles, with integrated 3D rendering within the web application to improve user navigation and orientation.
 - **Sendiit:** Academic express delivery system operating in five metropolitan branches, with optimized routes and specific user roles. I designed and developed the different system screens and led the FrontEnd development team, implementing reusable components and ensuring modular and scalable code.
 - **EventQRXpress:** Web platform developed to manage room reservations, seat assignments, number of guests, and invitation delivery, applying best practices in interface design and usability to ensure an intuitive and efficient experience.

Industrial Maintenance Technician

- **Highlighted courses:** Web Development, Electronics, Digital Logic, and Automation.

SKILLS

Technical: HTML, CSS, JavaScript, TypeScript, React, Astro, Bootstrap, Tailwind, SQL, C/C++, Python

Languages: Spanish – Native | English – Intermediate (B1)

Software and Tools: Windows, Linux, macOS, Git / GitHub, Figma

ADDITIONAL TRAINING / CERTIFICATIONS

- C++ Programming (Basic–Intermediate–Advanced) (Udemy, 2022)
- Training Camp México 2023 (Guadalajara, Mexico, 2023)
- Git y GitHub, HTML5 and CSS3 (Oracle Next Education, 2023)
